

A diver in a yellow helmet and black suit is shown underwater, holding a red flashlight. The background is a deep blue with some bubbles and a red star-shaped logo on the diver's suit.

Bridgeway

Consulting Limited

DIVING

Engineering Diving Services that make a difference...

"The level of service has been exceptional, not only from the site activities undertaken, but also the management and planning of the services that have been provided. I have reviewed and signed off many completed reports and can confirm that the quality is very good".

"...Bridgeway provided very thorough and informative engineering reports and a value for money solution..."

DIVING SERVICES

Bridgeway Consulting has an enviable record for the delivery of underwater engineering solutions to the construction, rail and highways sectors, with many years of industry experience both in the UK & international marketplace.
