*Permanent Way Engineering Services that make a difference...*

*"...these track engineering challenges were successfully met by the organisation and technical skills of all those involved..."*

# PERMANENT WAY ENGINEERING SERVICES

Bridgeway has a proven track record as a specialist supplier of permanent way engineering services within the rail industry.

## WHAT WE CAN DO

Our ability to problem solve and understand the issues and challenges of working within tight timescales and under track possession conditions ensures that project delivery is not compromised.

Our multi-skilled teams have particular expertise in plain line renewals, S&C renewal and maintenance, stressing, TSR management, track off/track on works, projects for bridge reconstructions, level crossing surface lifting & replacement, drainage installations, maintenance and vegetation removal. UTX construction management.

All our personnel are competence assessed in accordance with NR/SP/CTM/011 and we are Achilles RISQS approved for a full suite of Permanent Way activities including absolute track geometry.

We have a dedicated P-Way Engineering Team able to supply track bed investigation, track alignment surveys and structure gauging to facilitate new trackwork design.

- Track Maintenance
